

EXHIBIT C-3

MIDAMERICAN ENERGY COMPANY

Accommodation Required for Instrumental Internal Inspection Devices

Currently, the pipeline is able to accommodate internal inspection devices. The pipeline in Docket No. P-0831 was originally constructed in 1996 in accordance with internal inspection requirements of 49 CFR Part 192.150 issued on April 12, 1994.

The pipeline is included in MidAmerican Energy Company's transmission integrity management program. Field and electronic High Consequence Area ("HCA") analyses have determined there are HCA locations along the pipeline, based on HCA analysis performed in 2020.
