Re: Information regarding county's role in pipeline projects

Dear Supervisor:

The proposed Navigator Heartland Greenway LLC carbon capture pipeline project, which is pending before the Iowa Utilities Board (IUB) in Docket No. [HLP-2021-0003](#), is projected to go through your county and public informational meetings have been or will be held in your county. The Board of Supervisors play an integral role in pipeline projects.

Below are direct links to relevant information the IUB provided to counties and is available on the IUB's website.

- [Instructions for County Inspectors \(manual\)](#)
- [County's Role in Pipeline Projects \(presentation\)](#)

This information can also be found on the IUB's "[Hazardous Liquid Pipeline Permits](#)" webpage, which also includes a video of the IUB's webinar presentation on the county's role in pipeline projects.

You are receiving this letter as a courtesy reminder regarding the IUB's October 27, 2021, electronic filing system (EFS) [notification](#) in this docket. Please contact the IUB's IT Support staff at itsupport@iub.iowa.gov if you would like to sign up and receive regular EFS notifications of filings made in this docket moving forward.

We hope you find this information helpful.

Sincerely,

Jon Tack
General Counsel
Iowa Utilities Board
