MIDAMERICAN ENERGY COMPANY

2022 IOWA

ENERGY EFFICIENCY REBATE INFORMATION FOR YOUR BUSINESS

Equipment must be purchased between January 1, 2022, and December 31, 2022, and installed and operating prior to submitting the final rebate application. Applications must be submitted within six months of invoice or by December 31, 2022, whichever comes first. Rebates are issued on a first-come, first-served basis. Applications can be submitted via email to rebateapplications@midamerican.com.

For prescriptive rebates, the rebate payment cannot exceed 50% of the installed cost (reasonable labor and material/equipment – reasonableness to be determined by MidAmerican Energy Company). Installed cost includes contractor labor only and does not include internal labor.

Equipment not listed for prescriptive rebates may qualify for a rebate under Nonresidential Energy Solutions. These custom projects must be preapproved by MidAmerican prior to purchase and installation of equipment or systems. Projects must be completed within twelve months of preapproval. Commercial new construction projects are not eligible for prescriptive rebates through the Nonresidential Equipment program. All commercial new construction projects must participate in the Commercial New Construction program in order to receive rebates.

NONRESIDENTIAL ENERGY SOLUTIONS

The Nonresidential Energy Solutions program promotes comprehensive energy efficiency for existing commercial buildings and industrial facilities through two offerings: Small Business Express and Direct Project Assistance. These offerings are tailored to the unique needs of nonresidential customers by size and purpose. This program also serves agriculture and market-rate multifamily customers.

Custom incentives are based on first-year savings and calculated according to improvements made. Project incentives are the lesser of the calculated custom rebate or 70% of the eligible project cost, and the incentive may not reduce the simple payback period for the project to less than two years.

Electric improvements:
- HVAC – $0.18/kWh saved
- Lighting – $0.15/kWh saved
- Process/other – $0.12/kWh saved

Gas improvements:
- $1.50/therm

COMMERCIAL NEW CONSTRUCTION

The Commercial New Construction program provides complimentary energy design assistance and financial incentives to help offset the cost of implementing energy-efficient strategies. Qualifying projects must be:
- New construction, an addition or a major renovation with mechanical system replacement
- Early enough in the design process to implement energy analysis results
- Larger than 5,000 square feet
- Heated and/or cooled by a participating Iowa utility
- Able to achieve electric savings that are at least 5 percent better than energy code baseline

Project incentives (electric incentives only) are capped at 50% of total bundle incremental cost, cannot buy down a project below a one-year simple payback, or exceed $200,000 per building.

Incentives include:
- Free design assistance
- Design team and construction incentives

To enroll your project, call 877-939-1874 or email CNC@willdan.com.

INCOME QUALIFIED MULTIFAMILY HOUSING

The Income Qualified Multifamily Housing program serves income-qualified, multifamily properties, including institutional housing and emergency shelters. For existing, eligible properties, services include:
- Free materials and installation of select energy efficiency improvements
- Free comprehensive energy analysis of units and common areas
- Enhanced rebates up to 40% of installed cost for identified projects
- Free professional energy efficiency consultation through contractor bidding and equipment installation
- Free installation of attic insulation and air sealing for qualified properties
