

**Iowa 2022 Energy Efficiency Program Updates**  
**Effective Jan. 1, 2022**

| Program                         | Project/Equipment                             | Qualification Update/Change   | Rebate Amount | Description of update and/or decision factors for update                         |
|---------------------------------|---|---|---------------|--|
| <b>Nonresidential Programs:</b> |   |   |               |  |
| Nonresidential Energy Solutions | Custom project cap and customer incentive cap | Increased custom project cap from \$100,000 to \$200,000 and suspended the \$250,000 customer incentive cap | N/A           | Changes made to replenish project pipelines and encourage customer participation |

In 2022, at the customer's discretion, MidAmerican's implementation contractors and qualified service providers will complete assessments, non-emergency service/installation work and verification work in homes and businesses. MidAmerican and its contractors will continue to follow guidelines established to help both MidAmerican contractors and customers stay safe and healthy, including the use of proper PPE such as facemask and gloves and social distancing when required.
