List of IUB Dockets: HLP-2021-0001 (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)

Comments: I am against this pipeline. We are a young farm family trying to work hard to provide for our family and our country. We don't need all the hard work we have to be undermined by this pipeline through our farm ground. We are first generation farmers, we don't get help from our parents. We strongly oppose allowing this private company to take over our land for their own gain. We hope to be able to expand our farming operations in the future to include livestock and this pipeline would inhibit us from expanding. Please stand up for Iowa families and Iowa farms.

Co2 pipeline

Dear employees,

I object to any co2 pipe lines coming through my community or Iowa as a matter of fact as they are highly dangerous if there is a leak!

Thanks!

Bill Armstrong

Comments:

I am a co-owner of a Century Farm in Shelby County, Iowa that is in the path of the proposed Summit Carbon pipeline.

I am opposed to this project for many reasons but on this occasion, I want to briefly address the plans for Safety regarding a compressed hazardous liquid running through pipelines on our farm.

I want to know what education Summit has given to all communities impacted?

Since we have been told in local community meetings, that they have already ordered their pipe for this project, then I would assume they have already provided training and education seminars to all affected communities? Is that true, and if so, can you please advise where and when this training was done? Or, as I suspect, are they under the assumption that all emergency response teams- paid and volunteer already know everything they need to know to respond to a Hazardous compressed Co2 leak and or explosion?

For instance, say that there is a spill, leak or even an explosion at the site of our farm property in this fairly remote section of country. There are rural water lines on our property, there is a hog confinement near our property that belongs to a neighbor, there is a farmstead/home nearby. How will this be detected? Who is going to notify the people living nearby?

Who is going to remove the hogs in the confinement to a safer place? Who is going to notify the folks who drink water from the rural water line that it is or may not be safe to use? What is the anticipated timeline for all the emergency personnel arriving? Depending on the wind direction- how close will anyone be able to get to the disaster? Have routes for upwind, uphill been established by emergency response personnel to avoid being in the vapor cloud of the poisonous gas release? Does the emergency response team have appropriate air monitoring equipment to establish the extent of vapor travel? Does the emergency response team have Hazmat suits and equipment for their safety. How close will they be able to park to the disaster since vehicle engines are potential ignition sources? Or is Summit going to provide all Fire departments with electric vehicles to approach the scene- and is this even safe with the batteries that electric vehicles use? Who is going to evacuate those closely to a safe area? What will be the isolation zone set up?

The logistics alone in responding to this type of disaster are mind boggling.

Can you imagine how this one beginning of a disaster scenario is not even close to taking into account all that will need to be done to mitigate the disaster?

Please consider that given what we have heard thus far from Summit's plans, I am not convinced that they have a real plan to mitigate any disasters that their pipeline could cause.

Please note that I am opposing this project and request you do not approve the permit.

Respectfully,  
Connie Hansen Esker

April 25, 2022

Iowa Utilities Board  
1375 E. Court Avenue  
Des Moines, IA 50319

Dear Iowa Utilities Board,

I am writing today to file my formal objection to the Summit, Navigator and ADM proposed pipeline projects. I'm asking that you deny any permit application received for these three pipeline projects.

I'm extremely concerned about the following issues with regard to these three pipeline projects:

1. The abuse of Eminent Domain ... farmers shouldn't have to provide their land for free to for-profit businesses
2. Carbon pipelines are dangerous ... to humans, animals, and the environment
3. I strongly object to another project where taxpayers pay, but private pipeline companies profit
4. Carbon pipelines only add to the pollution of our land, waters and environment

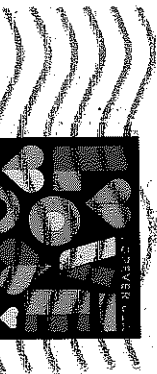

Please do not approve the permits that would allow these three projects to move forward in our state.

- HLP-2021-0003 (Navigator Heartland Greenway LLC, Petition for a Hazardous Liquid Pipeline Permit)

Comments:

I am against approval of CO2 pipelines and the use of eminent domain to acquire easements.

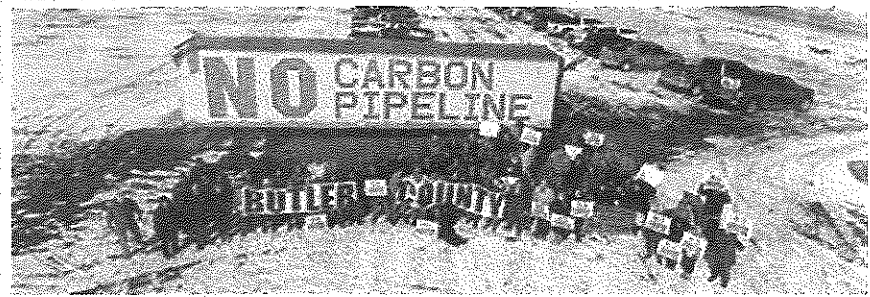

I am asking the IUB to view the following on YouTube: The Hazards of CO2 Pipelines. It is a very complete, scientific explanation of the dangers of hazardous pipelines and what we can expect if they are approved in Iowa and other states. There should be no question in the IUB members' minds about the approval of these pipelines after viewing this.

The people who are promoting and hoping to make a fortune from hazardous CO2 pipelines should be ashamed of their greedy money making schemes. I fear not only for the safety of our communities, but for the very system upon which our democracy is built. The common people in Iowa are being disregarded so these oligarchs can rob billions of dollars from our tax system that could be spent on developing less dangerous systems that would protect our citizens and our land.

Easement Team

April 26, 2022

Dear Iowa Utilities Board,

This is my 4<sup>th</sup> letter to you objecting to the proposed hazardous CO2 pipelines. In previous letters I noted the concerns of local landowners like myself, of impact on public properties like the Charles City Area Development site within the city limits and county infrastructure, and safety concerns.

I also noted that POET, the largest ethanol producer, has other strategies to reduce and utilize their CO2 emissions and is not involved in the pipelines. If Summit, Navigator and ADM Wolf employed Poet's methods, the temporary and permanent damage caused by pipeline construction on private and public properties as well as the liability and safety issues would be avoided.

The Iowa Legislature has had 3 bills introduced to limit eminent domain to public good, not corporate profit. None got out of committee for full debate. A bill to postpone the use of eminent domain till February, 2023, is unlikely to become law before the Legislature adjourns. Based on conversations I've had with Summit's land agents, survey crew members and construction staff, they assume the Iowa Utilities Board will impose eminent domain and that construction will begin in the spring of 2023.

Summit Carbon Solutions (SCS) submitted their request for eminent domain to you in January, 2022, without the required Schedule H showing the route and landowners affected. They have this information and are scrambling to increase the number/ percentage of landowners who have signed easement agreements voluntarily. The Navigator and ADM Wolf pipelines have already begun holding the required public meetings, are doing route surveys, and contacting landowners with easement agreements. If SCS is granted eminent domain, others will follow. The damage to private and public properties and concerns for public safety will increase. Floyd and Hardin County are among several counties hosting more than one of the proposed pipelines compounding the damage and safety concerns.

Iowa Public Television is broadcasting a series of Frontline programs on "The Power of Big Oil". The first program can be viewed at this link ( <https://www.pbs.org/video/the-power-of-big-oil-part-one-denial-redxh6/> ). Starting in the 1980s, oil company and independent researchers noted climate change and the link to fossil fuels. The show includes Congressional testimony from 1988 on the greenhouse effects and failed efforts to pass a BTU tax. Al Gore and representatives of Congress, major oil companies, the American Petroleum Institute, the Global Climate Coalition, Koch Industries and their CATO Institute, and a PR firm hired by the fossil fuels industry are interviewed. They describe coordinated efforts to raise doubts about climate change and the link to human activities and to influence public policy to their advantage. The impact of fossil fuels on local economies is stressed. Part II of this program was shown on PBS/ IPT at 9 PM on Tuesday, April 26<sup>th</sup>. All programs in the series can probably be viewed at the PBS website as well.

The CO2 pipeline companies are following the same playbook and many of the oil companies are supportive and involved in the pipeline permitting, construction and operation. Rising oil prices are being used to promote drilling on public lands and influence public opinion on related issues. Big Oil is enjoying record profits.

This ad below, paid by the Center for International Environmental Law, was published in the Washington Post. It summarizes many of the reasons why these pipelines are not the answer to our climate and environmental issues.

\*\*\*\*\*

## It's Time to End Carbon Capture of Climate Policy - An Open Letter to US and Canadian Leaders

On behalf of our millions of members and supporters across the United States and Canada, we call on policymakers to recognize that carbon capture and storage (CCS) is not a climate solution. It is a dangerous distraction driven by the same big polluters who created the climate emergency.

CCS is unnecessary. Renewable energy sources like solar and wind are cheaper and cleaner than fossil fuels. CCS just makes dirty energy more expensive and more energy-intensive.

CCS does not work. CCS projects have systematically overpromised and underdelivered. Despite the billions of taxpayer dollars wasted on CCS to date, the technology has not made a dent in CO2 emissions.

CCS will do little to reduce industrial emissions. Deploying CCS at scale is not economically viable for most heavy-emitting industries, such as plastic or chemical manufacturing. It diverts resources from available and scalable alternatives such as replacing fossil fuels with clean renewable energy sources to supply power and heat, and reusing inputs to reduce the production of virgin material.

CCS makes dirty energy even more dangerous for frontline communities. Facilities equipped with carbon capture technology have to burn more fossil fuel to get the same energy output, resulting in increased emissions of toxic and hazardous pollutants, like fine particulates (PM2.5).

CCS imposes even more risks on communities from CO2 pipelines and storage. Transporting, injecting, and storing CO2 presents new environmental, health, and safety hazards in communities targeted for CCS infrastructure. Pipelines can leak or rupture, and injection can contaminate water sources. These risks fall disproportionately on Black, Brown, Indigenous, and low-income communities, further entrenching a bleak history of environmental racism.

Most CCS benefits polluters. Nearly 80% of captured carbon is used to pump more oil out of the ground through "enhanced oil recovery." Polluting industries are using the myth of CCS to justify business-as-usual operations that are dangerous for the climate and communities.

Pumping even more public funds into new CCS subsidies for fossil fuel and petrochemical industries will just prop up unsustainable business models.

We don't need to fix fossil fuels; we need to ditch them. Instead of capturing carbon to pump it back underground, we should keep fossil fuels in the ground in the first place. And instead of bankrolling CCS, public funds should be boosting sustainable, job-creating solutions to the climate crisis, for fossil-dependent workers and communities: phasing out oil, gas, and coal; investing in energy efficiency and non-combustion renewable energy sources; and protecting forests and other ecosystems that naturally capture and store carbon.

\*\*\*\*\*

These pipeline projects are counting on public funds (Federal carbon credits and tax credits) to construct, operate, and maintain the pipeline and provide investor profits. Property taxes will also be required to cover on-going local infrastructure maintenance and repair costs. Who owns? Who controls? And Who benefits? Follow the money. NO EMINENT DOMAIN FOR CORPORATE GAIN!

Please include these concerns in your eminent domain considerations.

IOWA UTILITIES BOARD

Docket  
HLP 2021-0001  
HLP 2021-0003  
And  
ADM

## SAY NO SUMMIT, NAVIGATOR AND ADM CARBON PIPELINES!

**Summit, Navigator & ADM need OUR money  
and OUR land to make THEIR profits.**

Iowa is ground zero for at least three new pipeline projects  
that threaten Iowa's farmers, water and communities.  
Hundreds of landowners and 26 County Boards of Supervisors  
have formally objected to the pipeline projects.  
Please support Iowa's farmers and submit an objection.

### Top Concerns About The Proposed Pipeline Projects

- 1) Eminent Domain Abuse
- 2) Carbon pipelines are dangerous
- 3) Taxpayers pay, pipeline companies profit
- 4) Carbon Pipelines are not a climate solution

**Stand with Iowa Farmers and make your voice heard!** Tell the Iowa Utilities Board to reject the Summit, Navigator and ADM pipelines. Cut out the comment card below, add your name and mail it to:

Iowa Utilities Board  
1375 E. Court Ave.  
Des Moines, IA 50319

Dear Iowa Utilities Board,

I am writing today to file my formal objection to the Summit, Navigator and ADM pipelines. I ask that you deny any permit application received for the carbon pipeline projects.

1. This is not a Republican or Democrat issue but an Iowa issue.
2. This material is Toxic. There is no Planet B.
3. This has nothing to do about climate change. Rather:
4. This is a private company ruining our Prime Iowa land for their Profit for Perpetuity.
5. Easements / eminent domain will go with that land forever.
6. Mr Rastetter's tenure on his Projects is about 5 years.
7. He will laugh all the way to the bank As he waves Good bye; the farmers + County Supervisors will be left with his mess to deal with And pay Costs as well.
8. This pipeline will then become "the Problem."
9. This pipeline is not a utility for Common Good.
10. This legislature has for obvious reasons buried their head in sand + not dealt with eminent domain issues.
11. There is huge obvious conflict of interest here.
12. This Should not go forward until Summit complies with all requirements.
13. Navigator has done 2 pipelines in Southern states; Summit + has done none.
14. This will affect farm land values; resale values; tax revenues.
15. 11 farms will have Summit + navigator both.
16. What does Mother Earth - People in Dakota + Illinois - Army Corp of Engineers have to say about this?
17. This will not increase Iowa jobs - They'll bring people from Texas + Oklahoma.
18. Tom Miller + OCA should weigh in on this. There is a Ground Swell of objection to this.
19. 1<sup>st</sup> responders at all levels need to be equipped + educated.
20. I am 81 yrs old - Twice widowed - landowner - Tax payer - Voter - land Steward And

I Object to this debacle.

List of IUB Dockets:

- HLP-2021-0001 (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)
- HLP-2021-0003 (Navigator Heartland Greenway LLC, Petition for a Hazardous Liquid Pipeline Permit)

Comments:

I would like to formally submit two items to the Summit and Navigator docket.

1) An article from Iowa Farmer Today, published on April 16, 2022, titled 'Eminent domain big issue with carbon pipeline'. In the article, Iowa Corn Growers Association president Lance Lillibridge said "the group opposes the use of eminent domain to complete this project."

[https://www.agupdate.com/iowafarmertoday/news/state-and-regional/eminant-domain-big-issue-with-carbon-pipeline/article\\_3963c290-bb57-11ec-98e5-cb83d8552c57.html](https://www.agupdate.com/iowafarmertoday/news/state-and-regional/eminant-domain-big-issue-with-carbon-pipeline/article_3963c290-bb57-11ec-98e5-cb83d8552c57.html)

2) On Tuesday, March 29, over 125 impacted landowners convened at the Iowa State Capitol to testify about their opposition to the carbon pipeline projects. The testimonies are powerful and provide insight to the grave impact to landowners if the projects are approved.

<https://www.facebook.com/NoCCSIowa/videos/720330969345952>

I believe both of these items should be important information for the Iowa Utilities Board members to review before making a decision.

I am writing today to file my formal objection to the Summit, Navigator and ADM pipelines. I ask that you deny any permit application received for the carbon pipeline projects.

Add a note: CARBON + OIL pipelines ONLY benefit Big Oil Co's, NOT IOWANS

Dear Iowa Utilities Board Contingent,

I am writing today to file my formal objection to the Summit, Navigator and ADM Pipelines. I ask that you deny any permit application received for the carbon pipeline projects.

Carbon pipelines are not a climate solution so why should Iowa taxpayers pay for a pipeline that for-profit companies will gain rewards. Enough of tearing up the rich Iowa soil we should be planting trees and prairie lands to protect our soils and waterways.

Leo Kriz

To The Iowa Utilities Board:

I oppose the building of carbon pipelines for the profits of private companies.

This is my formal objection to the carbon pipelines proposed by Summit, Navigator and ADM. Please deny permit applications to these companies.

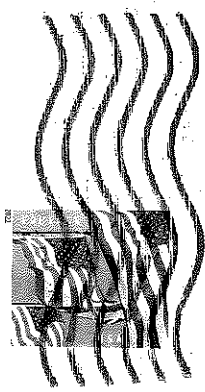

- The pipelines present serious danger to the health of humans and animals.
- They purport to help the climate but require intense farming (hard on our soil and water) to produce vast amounts of corn.
- Eminent domain is for projects for the public good (which these are not), not for business profit. Eminent domain should not be used for these projects.
- Ethanol production is short-lived technology. It will be – and should be – eclipsed by other less-dangerous forms of energy production shortly: wind and solar. The pipelines would only extend the time before we convert to more environmentally better climate solutions.

I ask that you do not succumb to pressure from the pipeline companies.

List of IUB Dockets: HLP-2021-0001 (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)

Comments: Summit intends to survey my property but my neighbor to the north has already entered into an easement agreement with Summit. There is NO reason for them to survey my property or trespass as long as they have surveyed the neighbors and have his south property line. This is a total invasion of privacy and blatant unnecessary trespass. I would appreciate it if the IUB would prevent this from happening.

We request that you deny the Summit, ADM, and Navigator Carbon Pipeline requests.

My spouse and I are retired Iowa attorneys who practiced extensively in farm real estate matters. It is our opinion that the use of Eminent Domain for acquiring the easements for this purpose is an abuse of Eminent Domain.

We own farmland in Hamilton and Story County land. Our Story County land is subject to the request of Navigator. We would like to pattern tile the Story County land in the future when our finances permit. The drainage on the land is poor. If the pipeline is installed, it will be impossible to tile in the future without damaging the pipeline. Navigator will made adjustments to allow installation in the future only if prior to installation, we provide a written plan by a qualified tile technician. This would be expensive.

# SAY NO SUMMIT, NAVIGATOR AND ADM CARBON PIPELINES!

**Summit, Navigator & ADM need OUR money  
and OUR land to make THEIR profits.**

Iowa is ground zero for at least three new pipeline projects  
that threaten Iowa's farmers, water and communities.  
Hundreds of landowners and 26 County Boards of Supervisors  
have formally objected to the pipeline projects.  
Please support Iowa's farmers and submit an objection.

## Top Concerns About The Proposed Pipeline Projects

- 1) Eminent Domain Abuse
- 2) Carbon pipelines are dangerous
- 3) Taxpayers pay, pipeline companies profit
- 4) Carbon Pipelines are not a climate solution

**Stand with Iowa Farmers and make your voice heard! Tell the  
Iowa Utilities Board to reject the Summit, Navigator and ADM  
pipelines. Cut out the comment card below, add your name and

# SAY NO SUMMIT, NAVIGATOR AND ADM CARBON PIPELINES!

**Summit, Navigator & ADM need OUR money  
and OUR land to make THEIR profits.**

Iowa is ground zero for at least three new pipeline projects  
that threaten Iowa's farmers, water and communities.  
Hundreds of landowners and 26 County Boards of Supervisors  
have formally objected to the pipeline projects.  
Please support Iowa's farmers and submit an objection.

## Top Concerns About The Proposed Pipeline Projects

- 1) Eminent Domain Abuse
- 2) Carbon pipelines are dangerous
- 3) Taxpayers pay, pipeline companies profit
- 4) Carbon Pipelines are not a climate solution

**Stand with Iowa Farmers and make your voice heard! Tell the  
Iowa Utilities Board to reject the Summit, Navigator and ADM  
pipelines. Cut out the comment card below, add your name and  
mail it to:**

Iowa Utilities Board  
1375 E. Court Ave.  
Des Moines, IA 50319

Dear Iowa Utilities Board,

I am writing today to file my formal objection to the Summit,  
Navigator and ADM pipelines. I ask that you deny any permit  
application received for the carbon pipeline projects.

Add a note: Please say no to the pipeline  
project + No to eminent domain. Thank  
you.
