

Dear Iowa Utilities Board,

I am writing today to file my formal objection to the Summit, Navigator and ADM pipelines. I ask that you deny any permit application received for the carbon pipeline projects.

Add a note: Think of what is best for Iowans... This isn't it. No pipelines!

From: Mel <mdenny-schiltz@cox.net>
Subject: Objection to eminent domain for carbon pipeline
Date: April 30, 2022 at 12:35:58 PM CDT
To: mdennyschiltz@icloud.com

I object to the use of eminent domain to acquire land for the building of the carbon pipelines in Iowa and or any other state where big business will attempt to steal private property against the land owner's permission by the use of eminent domain.

My mother, who is alert and oriented and is over 101 years old, still owns the family farm which her and my father purchased in 1954. The farm is a no till property. The area of the proposed pipeline on moms farm crosses tilled land and close to the well which provides water to livestock and the homestead on the farm. The possibility of a pipe rupture and ground water contamination is not something that should be taken lightly as these are classified as hazardous pipeline under high pressures. If the soil is disturbed from placement of the carbon pipeline the beneficial microbes will be destroyed (no till farm) taking years to rebuild the soil to previous condition prior to the pipeline being placed.

If the carbon pipeline is placed on my mother's farm there would be a decrease in the value of the property due to the risk to people living in the area of the pipeline from leak and or rupture, easement restrictions on land use and continued maintainance of a hazardous pipeline.

Failure to acknowledge the hazard of carbon pipelines is dangerous due to the possibility of environmental contamination, risk to the population of Volunteer Fire Fighters, First Responders, communities and people living in the area of the pipeline.

These pipelines are developed and owned by private companies and do not benefit the land owners and do not have public use. There is big money to the private companies

from tax credits offered and in future revenue. These profits will not be shared with the general population only placed into the pockets of the private companies.

We elect people to protect us, officials who are willing to stand up for the rights of private citizens against the abuse of big corporations. Now is the time to take action to **STOP** eminent domain and **put people over corporate profits.**

Zip Code: 51530

Email Address: jgaul@fmctc.com

List of IUB Dockets: HLP-2021-0001 (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)

Comments:

It has been brought to the city's attention that Summit Pipeline is requesting to build a CO2 pipeline within a half mile of Earling, IA. At the March 14, 2022 city council unanimously voted for the mayor to send a letter to Iowa Utilities Board expressing objection of pipeline. Earling is a small quant rural farm town. Our population is approximately 397 with majority of farmers retiring and moving into the town. The rest of the population are working class citizens that are currently working in larger cities such as Denison, IA and Harlan, IA.

Our local fire department is strictly volunteer local citizens and farmers in Earling or nearby. They have no been advised on such pipeline coming so close to the town. There is no way for the local fire department to handle a crisis regarding leakage of pipeline.

With plans for pipeline to go on the east side of Earling, that is where we have a beautiful park and baseball field. During summer month there are many children playing at the ballfield with no adult supervision. Also, Earling is in the process of completing a creek mitigation that will be turned into more recreational area along the already park. What would happen if something would go wrong with pipeline and these children would be affected?

Where would personal be located if a problem does arise with pipeline and timeline for them to take action? This pipeline is also located closely to our water supply.

Please consider, relocating pipeline if it must be built.

Sincerely

Janice Gaul, Earling Mayor

Comments:

I Object of the CO2 hazardous liquid pipeline running through the land that I have maintained for all these years.

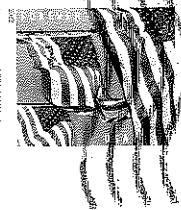

I Object to these companies being able to force Eminent Damain on us to get tax breaks and I have to pay the land tax each and every year.

We have MidAmerican Power Line running through it now with an easement. That has its headaches in itself. We have to make sure they do not cut any more trees down then they are suppose to and put back the fences they do not close or put back up when they are done!

Say "NO" to these Companies!

Subject: Inquiry from the IUB web site
To: <iub@iub.iowa.gov>

Dear Sirs or Madams:

I am writing to oppose the use of eminent domain to allow hazardous pipelines to cross private land in Iowa. I have heard that land owners are being harassed to sign easements they do not want to sign. We need strong protections against such harassment and against unlawful surveying of land by company officials.

We need more than a moratorium. We need a permanent ban on eminent domain. These CO2 pipelines are for private profit and will do nothing to decrease carbon emissions in Iowa. They could, however, rupture and cause death or lasting injury to those nearby.

I stand with the Farmers Union on this issue.

Sincerely yours,

Julie Fischer

[illegible]

Iowa Utilities Board

Ladies and Gentlemen:

This is my formal objection to the carbon pipelines proposed by Summit, Navigator and ADM. Please deny permit applications to these companies. Iowa has only one permanent and indispensable resource, its fertile land. For many years in the late 19th and early 20th centuries, the population grew quickly, as the land was settled and farmed producing grain and livestock to feed the country. BUT, intensive chemical farming by corporate agribusiness has robbed our topsoil; depleted our water supply and fouled our surface water resources. Now, these companies want to foul the land even more to encourage more farmers to produce more corn industrially to mix with fuel oil to run more and more internal combustion engines which quickens climate change! Stop the madness!

I have attended two of the public hearings in central Iowa which the IUB convened. No adequate answers to safety concerns of citizens and land-owners were forthcoming. It was stipulated that these pipelines will destroy the fertility of the taken land forever. It was stipulated that for a one-time fee, the companies involved will share in the profits and the land-owners and the citizens and the land-owners will take all of the risks, and suffer the lasting consequences of leaks and /or explosions.

To add insult to injury, these companies want to use eminent domain to take land from unwilling sellers. Eminent domain is reserved for government taking of land in the public interest, NOT corporate interests. They will try to convince you that they are trying to do their part to slow climate change—what a laugh: It takes more water and energy to produce ethanol than it saves consumers at the pump and CO₂ is still coming out of all of our tailpipes; Ethanol production as a fuel additive is and will be a short term technology. It has never made sense economically or environmentally and the loss of soil fertility and topsoil lost to erosion is staggering. The ethanol industry and existing CO₂ pipelines will be obsolete in 10-15 years.

For safety reasons, for environmental reasons, for legal reasons I ask you to deny permit applications for CO₂ pipelines in Iowa. Thank you

Comments:

My name is Pamela J. Lines, Trustee of the Lines Trust and I'm an impacted landowner in Floyd County of a proposed CO2 pipeline. Summit Carbon Solutions, LLC has violated Iowa Law, 479b.14, because it did not send the required 10-day notice prior to survey via restricted certified mail. The letter intended for me was sent via certified mail only, which is not the same as Restricted Certified Mail.

This is another example of this company not following Iowa law. Proper notice via Restricted Certified Mail is important to ensure the landowner knows that someone will be on their property. Proper notice ensures safety and transparency. The USPS defines Restricted Deliver as "allows the mailer to direct delivery only to the addressee or the addressee's authorized agent".

Perhaps this is an attempt to save the \$6.00 in additional cost that a proper Certified Mail Restricted Delivery costs above the \$3.75 for a Certified Mailing. If this is the intent, it should not give the IUB confidence in the financial stability of this company.

Iowa law is clear, and it is unacceptable that this pipeline company would skirt the law. If they can't even follow simple Iowa laws around notification, how can I trust that they will follow any other law meant to protect Iowans?

Iowa Law 479B.21 provides "A person who violates this chapter or any rule or order issued pursuant to this chapter shall be subject to a civil penalty levied by the board in an amount not to exceed one thousand dollars for each violation". I formally request that Summit Carbon Solutions, LLC be issued a civil penalty of \$1,000 for this violation. This has caused myself and my family a significant amount of stress and inconvenience in worry and wasted time, as well as legal fees to understand our rights. You simply can't allow us to be treated this way.

I am a widowed 69-year-old retired School Librarian who was told by the representatives of DDSI of Tulsa, Oklahoma that they had permission to be on

my land to survey. When I asked who gave them permission, they said their boss did. I told them I had not received notification of survey intentions and I considered them trespassing. The foreman of the crew argued with me that they were going to survey. He insisted that I did not know what I was talking about. As an older female I felt extremely intimidated and dismissed by the male survey crew. If my son had not been there, I feel I would have been sidestepped. I contacted the Sheriff's Department of Floyd County, who sent out a Deputy to get these people off my land. My late husband and I worked hard all our life to purchase our farm and to have my rights as a landowner thrown in my face, I feel is a violation of my rights!

Attached is a copy of the Sheriff's department report of this trespassing violation that occurred on March 28, 2022.

I also formally request that any information obtained via such illegal surveys that were conducted without proper notice not be considered by the IUB at any further date and that they are deemed invalid.

Your prompt attention to this matter is appreciated.

Thank you, Sincerely,
Pamela J. Lines

Comments:

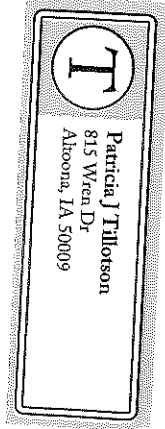

On April 1, 2022 a Northern Natural Gas truck showed up on my property. The Northern employee told my son that they are marking the gas main from Bassett to Rockford. Yes, I have flags across my field every 50 feet. The Northern Natural Gas employee said he was sent out by Mergent Company who is employed by SCSMCE Company. He said starting Monday that company will be doing "biological and cultural surveys" not going deeper than 2 feet.

On April 27, 2022 a group of individuals were walking across my land. When I told them they were trespassing they did leave.

This is another example of Summitt company not following Iowa law. Again, my rights as a property owner have been violated.

Sincerely

Pamela J. Lines

Comments:

I object to Summit's Hazardous Pipeline running through my property.

I, also, want to complain about that I was getting phone calls to survey my land from someone from Arkansas, before our town meeting.

At the meeting in October, my daughter said "that no one was to be contacting me until all the meetings were done in February."

So, she did contact James Mikles, to let him know I/we OBJECT to them coming on my land.

I am writing today to file my formal objection to the Summit, Navigator and ADM pipelines. I ask that you deny any permit application received for the carbon pipeline projects.
