 - a. Enclosed is a revised Exhibit A, as requested.
 - b. Exhibit A was revised as requested.
2. Exhibit B
 - a. Enclosed are revised portions of Exhibit B, as requested.
 - b. Exhibit B was revised as requested.
 - c. Exhibit B was revised as requested.
 - d. The source for the waterways shown on Exhibit B was the NHD Flowline feature class produced by the EPA. The source for the recreational lands shown on Exhibit B was the Protected Areas Database, produced by the United States Geological Survey.
3. Exhibit C
 - a. Enclosed is a revised Exhibit C, as requested.
 - b. Enclosed is an addendum to Exhibit C to address this comment.
 - c. Maximum allowable operating pressure is not applicable.
 - d. Exhibit C was revised as requested.
 - e. As stated in Exhibit I, the pipeline will be placed underground in Iowa with no less than 48 inches of cover to the top of the pipe in all agricultural lands except (a) where less cover is requested by the landowner and SCS determines the request is prudent and otherwise lawful or (b) where there is a subsurface obstruction that would prevent SCS from utilizing the 48-inch depth, in which case the depth will be in accordance with applicable federal and state rules.
4. Exhibit I
 - a. Enclosed is a revised Exhibit I, as requested.
 - b. Exhibit I was revised as requested.
 - c. Exhibit I was revised as requested.
 - d. Exhibit I was revised as requested.
 - e. Exhibit I was revised as requested.
 - f. Exhibit I was revised as requested.
 - g. Exhibit I was revised as requested.
5. Additional Comments
 - a. Enclosed is a revised Exhibit F to address this comment.
