IOWA UTILITIES BOARD

**Docket Number: HLP-2021-0003**

The proposed Navigator CO2 pipeline runs through my county. This pipeline, along with the proposed Summit and Wolf/ADM pipelines, threaten to form an extensive web of hazardous liquid CO2 lines throughout all of Iowa.

This pipeline, if approved, will:

- **Extend the life of ethanol**, while it is clear that the world needs actual clean infrastructure, such as wind and solar energy.
- **Allow eminent domain abuse.** CO2 pipelines do NOT benefit the public and there is still not enough research to determine if carbon sequestration is a viable option to lessen the impact of industry on our atmosphere.
- **Damage our land permanently...** as seen with oil pipelines in Iowa, farmland was damaged irreparably, at the farmer's own cost.
- **Pose a huge safety threat** to rural and indigenous communities in the occurrence of a leak or explosion. CO2 is an asphyxiant that causes lifelong respiratory damage and emergency vehicles engines will not be able to run in affected areas of a leak or explosion.

**I urge you to VOTE NO ON THE NAVIGATOR PIPELINE.**

Additional Comments:

there should be  
no Eminent  
Domain for  
private gain!  
this is wrong  
for Iowa, and  
not a violation!

Family Farm in  
Pocahontas County

Additional Comments:

the proposed pipeline  
would go diagonally  
across our Century  
farm, making two  
areas entirely  
unusable. We are  
a Family Farm, not a  
corporation. This  
would destroy our  
livelihood.
