Submitted to the Iowa Utilities Board

July 29, 2022 05:55 PM CDT

Objection to be filed in Docket Nos.:

- HLP-2022-0002 (*Wolf Carbon Solutions US LLC*; Hazardous Liquid Pipeline)
- HLP-2021-0003 (*Navigator Heartland Greenway LLC*; Petition for Hazardous Liquid Pipeline Permit)

Please vote NO to Summitt Carbon Solutions pipeline, Navigator Heartland Greenway, LLC pipeline & Wolf Carbon Solutions US LLC pipeline.

The use of eminent domain does not benefit any landowner in the State of IA and is an abuse of this power by the IUB.

These pipelines have HUGE safety risks transporting hazardous liquid carbon under high pressure. The exposure of this hazardous gas when an eruption occurs is devastating-not just when it occurs, but for years.

The only reason they are applying for a pipeline in the State of IA is the tax dollars. Where will they be when these dollars run out? Who will they sell the pipeline to next? The only letters I've seen in favor of these pipelines are the pipelines themselves & the few companies that say they will bring in more jobs & taxes for their area. But what tax dollars will be there for these companies when the pipelines pull out because the tax dollars are all gone? What will happen to all these additional jobs when they pull out-because they will and who will they sell the pipelines too?

These pipelines do not care about the farmland in Iowa-just the millions of dollars they will make for themselves from the free federal tax monies. IUB - please listen to the landowners & VOTE NO
