Objection to be filed in Docket Nos.:

- HLP-2021-0003 (*Navigator Heartland Greenway LLC*; Petition for Hazardous Liquid Pipeline Permit)

It is my belief that this CO2 pipeline will be carrying highly toxic and dangerous chemicals. My main concern is if there is any leaks or breaks along the pipeline that it would contaminate our land. The land that I own is considered to be a forest reserve and I would hate to see that tainted either by plowing through with the huge machinery or if there was a leak of some kind. Please consider this my official objection to the project.
