Submitted to the Iowa Utilities Board

August 05, 2022 01:48 PM CDT

Objection to be filed in Docket Nos.:

- HLP-2021-0003 (*Navigator Heartland Greenway LLC*; Petition for Hazardous Liquid Pipeline Permit)
- HLP-2022-0002 (*Wolf Carbon Solutions US LLC*; Hazardous Liquid Pipeline)
- HLP-2021-0001 (*Summit Carbon Solutions, LLC*; Petition for Hazardous Liquid Pipeline Permit)

I object all of the Hazardous liquid pipelines for many reasons:

- 1) This is an abuse of eminent domain - which should only be used for public good projects, not private profit. No eminent domain for private gain!
- 2) Landowners are being harassed by pipeline companies and their hired surveyors. One farmer said she has had more calls than in a presidential election year.
- 3) Health and safety threats are being ignored. CO₂ is an asphyxiant, and local emergency response teams are not prepared for a leak.
- 4) Companies are spouting greenwashing lies. CO₂ pipelines are false climate solutions that prop of the fossil fuel industry.
- 5) We must respect and protect tribal land and lives. These projects sanction land theft and harm to Indigenous communities. Previous pipeline projects increased human trafficking and contributed to the Missing and Murdered Indigenous Relatives epidemic (MMIR).
