Submitted to the Iowa Utilities Board

August 09, 2022 08:56 AM CDT

Objection to be filed in Docket Nos.:

- HLP-2021-0003 (*Navigator Heartland Greenway LLC*; Petition for Hazardous Liquid Pipeline Permit)

OBJECTION

I object the construction of the pipeline on my farm or any farm for that matter. Summit carbon solutions wants to put the pipeline down the middle of my farm. My farm is a farm with many terraces on it and I do not want the hills and terraces disturbed by the construction of a pipeline that we do not need. I also cannot believe how much we have been threatened with eminent domain and lied to about how many people have already signed easements. If you want to get this pipeline to go through then you have to pay the landowners a lot more than what you are offering them. These companies are trying to steal this land away from us. So I will say again I OBJECT the construction of Summit carbon solutions CO2 pipeline!
