

**Iowa 2020 Energy Efficiency Program Updates**  
Effective September 15, 2020

Program	Project/Equipment	Qualification Update/Change	Rebate Amount	Description of update and/or decision factors for update
<b>Residential Programs:</b>				
Residential Equipment	Whole house ductless minisplit heat pump	New measure • Minimum efficiencies; SEER 18, EER 12 and HSPF 10 • Must be an inverter-based unit • Listed in current AHRI directory – the indoor and outdoor combination must be AHRI certified validating that the system meets the minimum SEER requirements • Minimum 12,000 Btuh (whole house mini-splits only) • Must replace electric resistance heat • Must be primary heating and cooling source for either the entire home (whole house mini-splits) or be add-on supplemental heating and cooling for individual existing or new rooms (supplemental mini-splits for existing or new spaces) • Cooling only systems are not eligible • System must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or multifamily property with all units on a MidAmerican residential rate. Each residential home or unit must have a dedicated heating and cooling system (central heating and/or cooling for multiple units in a multi-family property do not qualify). • The rebate cannot exceed 50% of the installed cost.	SEER 18-21 \$200/ton SEER >21 \$300/ton	MidAmerican is reintroducing residential ductless mini-splits in accordance with MidAmerican's 2019-2023 settlement agreement.
Residential Equipment	Supplemental ductless minisplit heat pump for existing space	New measure • Minimum efficiencies; SEER 18, EER 12 and HSPF 10 • Must be an inverter-based unit • Listed in current AHRI directory – the indoor and outdoor combination must be AHRI certified validating that the system meets the minimum SEER requirements • Must be primary heating and cooling source for either the entire home (whole house mini-splits) or be add-on supplemental heating and cooling for individual existing or new rooms (supplemental mini-splits for existing or new spaces) • Cooling only systems are not eligible • System must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or multifamily property with all units on a MidAmerican residential rate. Each residential home or unit must have a dedicated heating and cooling system (central heating and/or cooling for multiple units in a multi-family property do not qualify). • The rebate cannot exceed 50% of the installed cost.	SEER 18-21 \$100/ton SEER >21 \$150/ton	MidAmerican is reintroducing residential ductless mini-splits in accordance with MidAmerican's 2019-2023 settlement agreement.
